# How to Create your SiteSeer3D™ Map

Register

Register to create your SiteSeer3D account login and password.

(Write your login information down as you will need it to manage and edit your 3D map)

Step 1 - Brand 3D Website

Enter your contact information and upload your icon.

(The information you enter on this screen will appear on your SiteSeer3D map. The example is outlined in red)

Step 2 – Build and View 3D Website

Enter your business street address to locate your business. The red map marker will appear when you click "Map location". (If you are not satisfied where the map marker appears simply drag it to your desired location)
Enter the link you would like on your 3D map and the desired business label.
Click "Update".

Click "View and Customize Your 3D Website" located directly under the map to launch your Site-Seer3D map.

This is when the necessary software to view your SiteSeer3D map is installed.
(Note: You will be directed to this page only if you have not previously viewed a SiteSeer3D map.)

You will see an install page with the heading "Install TerraExplorer for Use with SiteSeer3D™."
Review the computer system requirements and the license agreement.

Click "I Accept" —follow the prompts—and watch as your SiteSeer3D map builds.
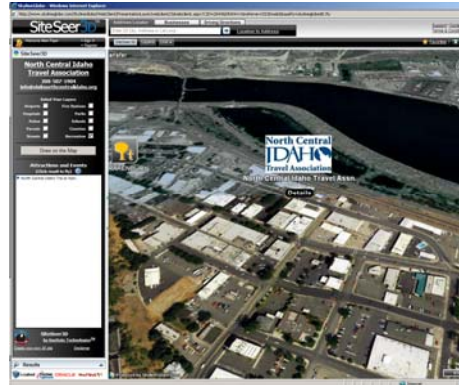

How to Use the SiteSeer3D™ Draw Tools

Your SiteSeer3D map should look like this.

You are now ready to customize the 3D landscape.

Customize your Business Location

Use the labeling and drawing tools to label your amenities, draw on your 3D map, and create links to your desired business information.

Click "Draw on the Map" to Access the draw and label tools.

Once you have created your drawings and labels Click "Publish your drawings to your website".

Label Tool

Text Enter the label in the properties box, then click the desired terrain location

The property screens are identical for each of the following three draw options

Free Hand Draw Tool

Click the terrain and drag to draw the line

Line Draw Tool

Click the terrain to add points—right click to exit the drawing mode

Polygon Draw Tool

Click the terrain to add points—right click to close the polygon and exit the drawing mode

Properties

Line Properties

Color: FG: BG:

Pick your line colors —or use the default

Fill Visibilty: 100 %

The fill visibility is an option when you are creating a polygon.
0% - creates a border around your shape
100% - creates a solid shape

Line Style: Wide

Line Width: 1 feet

Description: Polygon

On click : ● Pop up text ○ Link

Pop up text:

You have 2 options to attach to the label
1)create a pop-up text
2)create a URL link
Simply follow the prompts

Pick your line style– or use the default

Pick your line width– or use the default-we suggest changing this to 3 feet

You can have more than one drawing so create a unique name here.

Save & Close

How to Use the SiteSeer3D™ Management Tools

Login in to Your SiteSeer3D account

Go to www.SiteSeer3D.com and
click "Client Login"
Enter your login and password that was created when you registered.

(This takes you back to the management tools. You can go back to Step 1 and Step 2 to edit your SiteSeer3D map or move on to the publishing and sharing tools)
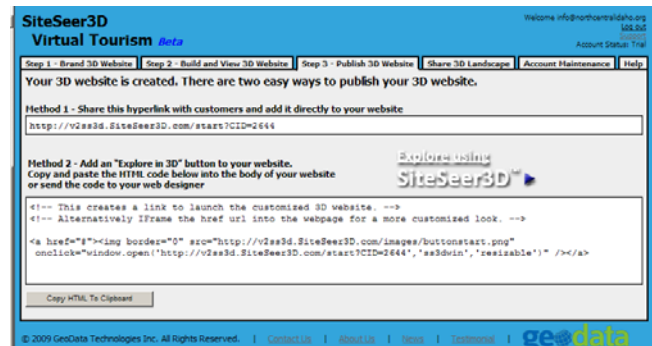

Step 3—Publish 3D Website

This is the utility you use to add SiteSeer3D to your existing website.
There are 2 methods:
Method 1—add a hyperlink to your website
Method 2—add HTML code to the body of your website.

(This gives your website visitors the opportunity to fly around your area and business as if they were in a hot air balloon.)

Share 3D Landscape

SiteSeer3D allows you to share your content with other SiteSeer3D websites, and other SiteSeer3D websites to share their content with yours.

Your Share ID appears here

(To share content, either:
 - enter a Share ID from another user
 - give your Share ID to another user and have them enter your share ID)
